**10th International BCI
Meeting**

June 6-9, 2023

Sonian Forest, Brussels, Belgium

Dear Collaborators and Industry Partners,

It is with great pleasure that we invite you to partner with us for the 10th International BCI Meeting to be held at the Dolce La Hulpe in Brussels, Belgium on June 6-9, 2023.

These are exciting times, with significant expectations regarding direct connections between brains and smart technologies. An increasing number of companies are incorporating BCI into their agendas. Effective BCI research depends on interdisciplinary interactions among neuroscientists, psychologists, engineers, applied mathematicians, computer scientists, psychiatrists and clinical rehabilitation specialists. The 10th International BCI Meeting is the **only** venue which brings these groups together and attendance has increased with the rapid growth of the field.

We anticipate that more than 400 delegates from BCI research groups from around the world will converge to share knowledge and fresh ideas in the unique, highly interactive, student-friendly, retreat-like atmosphere that are the hallmarks of the BCI Meetings. The Meeting venue will provide ample space for exhibitors and sponsors to showcase your products and services, and to allow delegates and sponsors to network and interact.

BCI research seeks to provide communication and control technology that does not rely on neuromuscular output. BCI's can restore the capacity for communication and control to people with severe disabilities, by enabling them to use brain signals rather than muscles to control cursor movements, make selections on a computer screen, operate neuroprostheses, and/or use a wide variety of other devices as well as to enlarge the range of interaction experiences for able-bodied users.

This meeting should, like its predecessors, contribute greatly to BCI research and development.

We would like to take this opportunity to thank those of you who have sponsored or exhibited at the BCI Meetings in the past, and look forward to continuing our relationship. We also welcome new organisations and are excited about creating a collaborative partnership with you. Full details on how to get involved can be found in this package.

We hope to see you next June for what promises to be a very enjoyable and productive 10th International BCI Meeting.

Regards,
Jennifer Collinger
President, BCI Society

What is the 10th International BCI Meeting?

The International Brain-Computer Interface (BCI) Meetings is unique in providing an interdisciplinary, collaborative environment that convenes representatives from all fields involved in BCI research, including scientists, engineers, clinicians, policymakers, and users. Attendance has increased with the rapid growth of the field. Fifty researchers participated in 1999, 90 in 2002, 160 in 2005, 280 in 2010, 301 in 2013, 406 in 2016 and 420 in 2018. In 2021 a virtual meeting was held, vBCI, which drew 395 attendees and in 2022 a one-day virtual meet-up with 98 attendees took place to keep members, researchers, and sponsors involved and engaged. In 2023 we are back to an in-person meeting and are expecting more than 400 delegates participating in this first in-person meeting since the start of the pandemic.

The 2023 Meeting will update attendees on the present state of the field, address key issues critical to further progress, and promote the education and participation of young researchers.

The program will include keynote lectures from distinguished international guest speakers, a range of community-initiated workshops, demonstrations of functioning BCI systems, poster and oral presentations, master classes, as well as other highly interactive and engaging events. **Our goal is to foster collaboration, exchange and networking between established investigators, postdoctoral fellows and graduate students.**

The 2023 Meeting Executive Team includes:

- Jennifer Collinger, University of Pittsburgh, Conference Chair
- Mariska Vansteensel, University Medical Center Utrecht, Conference Co-Chair
- Donatella Mattia, Fondazione Santa Lucia, Scientific Program Committee Co-Chair
- Natalie Mrachacz-Kersting, Albert-Ludwigs-Universität Freiburg, Scientific Program Committee Co-Chair
- Davide Valeriani, Neurable Inc., Young Talent Committee Chair

The overall conference planning process is organized by the **BCI Society and the team at Podium Conference Specialists.**
